

PETERBILT MODEL 210

From the wrap-around glass to the tight turning ratio, the Peterbilt Model 210 offers drivers the ultimate in maneuverability. Ideal for the urban environment and drivers without a CDL, the Peterbilt Model 210 is available as a Class 6 straight truck with GVW rated at 26,000 pounds. To make drivers feel more comfortable and confident, the Model 210 features generous windows for outstanding visibility and an exceptionally tight turning radius for best-in-class maneuverability. Recommended for bodies between 18 and 26 feet in length, base models are available with an automatic transmission and air suspension.

The Model 210 is designed for driver productivity with 360° visibility, tight turning capacity, rugged protection and convenient storage. It's ideal for pickup and delivery, towing, refrigerated van, roll-off and landscaping applications.

Exceptional visibility results from the combination of an expansive windshield, extra large side windows and heated mirrors.

With an extremely tight turning radius, the Model 210 readily tackles tight spaces and masters difficult maneuvers.

Made of a single piece of steel, the painted bumper is designed for maximum protection and rugged durability.

Drivers appreciate the ample storage capacity in the overhead compartments that run the width of the cabin.
