

## PETERBILT MODEL 220

The Model 220 is a beautifully compact package offering driver comfort, easy service, entry safety features and vigorous power. It's ideal for pickup and delivery, towing, refrigerated van, roll-off and landscaping applications.

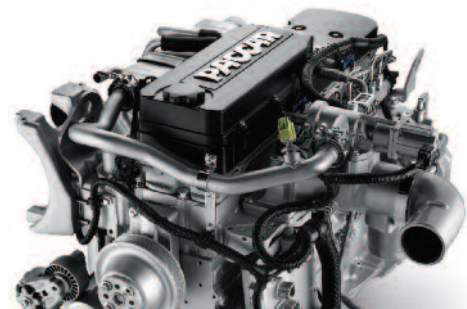

*A wraparound dash highlights the spacious interior. The ergonomic design and automotive feel combine to enhance driver comfort and productivity.*

*Service checks are easy. The front panel opens for quick access to the air filter, coolant, washer fluid, power-steering fluid, refrigerant and engine oil.*

*Entry and exit are safer and easier with stair-style steps with non-slip treads and ergonomically positioned doors that open a wide 90 degrees.*

*Although it's lightweight and fuel efficient, the PACCAR PX-6 engine delivers up to 280 horsepower. It's a proven workhorse that's also easy to service.*

The Peterbilt Model 220 delivers a combination of maneuverability, visibility and value that is best in class. A Class 7 dynamo with a GVW of 33,000 pounds, it's tailor-made for environments requiring a tight turning radius. The Model 220 is recommended for bodies between 20 and 26 feet in length. With low chassis weight, it's perfect for high volume payloads. The optional automatic transmission, standard air suspension and air brakes available on base models make it even easier for the driver to get the job done.
