

PETERBILT'S

MEDIUM DUTY

MODEL
348

A **PACCAR** COMPANY

PETERBILT MEDIUM DUTY

The Model 348 is built to take on the big jobs. This truck was designed to exceed the rigid demands of Class 7 and Class 8 specialty application markets that require rugged durability and a wide range of option content. The Model 348 represents a multi-dimensional performer with a GVW beginning at 35,000 lbs. and optional capacity ratings to suit almost any specialty vocation. It is available in both truck and tractor configurations and can be spec'd to meet virtually any application.

CONVENIENCE, COMFORT & CLASS

Peterbilt's Model 348 provides the driver with an unsurpassed combination of comfort and reliability. The ergonomically designed driver display package features brightly backlit gauges that are easy to read and simple to understand and includes key vehicle performance data. The Model 348 also includes power windows, mirrors, and lock switches all located in the door pad design for added convenience. Dual cup holders are within easy reach of the driver and passenger, and a "dead" pedal provides a comfortable seating position.

BUILT TO LAST

The Model 348 is constructed of an all-aluminum cab that is lightweight for fuel efficiency and corrosion-resistant for durability. The Metton® hood is lightweight but strong, and tilts open a full 90-degrees for easier access to key service points. A HVAC system not only improves air flow, but also reduces maintenance costs. The dash's "in-mold" color process imbeds color permanently into the material resulting in an extremely durable, fade resistant finish.

PACCAR FINANCIAL PACLEASE AND PACCAR FINANCIAL PLANS TAILORED TO YOUR NEEDS.

VERSATILITY THAT PAYS

The Model 348 is available in either a truck or tractor configuration with a GVW between 35,000 – 56,000 lbs. The Model 348 can meet the demands of virtually any work application and is spec'd to meet the needs of any business, including pickup and delivery, food services and beverage distribution. The Model 348 is also available in an all-wheel-drive configuration specifically designed for off-road vocational applications such as construction, petroleum delivery, refuse and utility service where rugged durability, increased maneuverability and reliable performance are critical.

For environmentally friendly operation, the Model 348 is available in a hybrid electric configuration.

FUEL EFFICIENT POWER

PX-6 engine

PX-8 engine

Peterbilt offers customers a choice of two proprietary, fuel-efficient engines. The PACCAR PX-6 engine (200 - 360 hp) offers the highest horsepower to weight ratio in the industry while the PACCAR PX-8 (260 - 380 hp), provides up to 1,050 lb-ft of torque for heavy loads. Advanced electronics help the engine run smoother and more efficiently, as well as reduce service costs. PACCAR engines provide a wide range of horsepower and torque and outstanding fuel economy for greater overall performance.

THE VIEW TO PERFORM

Peterbilt engineers have designed significant visibility improvements into the Model 348. An overall 17% increase in side window visibility was the result of lowered and slanted side window beltlines. Additionally, the dash sightlines have been adjusted to improve forward visibility. This provides an advantage for drivers operating in congested, urban environments or vocational worksites.

PETERBILT VALUE
