

MODEL  
**365**

*Peterbilt*

A **PACCAR** COMPANY

# MODEL 365

The rugged and versatile Peterbilt Model 365 features innovative solutions to improve ride and handling, enhance weight distribution and maximize performance and profitability. The Model 365 has a 115" BBC, and is available in both set-forward and set-back axle configurations, as a day cab or with a Unibilt® sleeper. The chassis is designed to comply with state and federal bridge law regulations. The Model 365 is ideal for virtually any vocational or construction application.

A **PACCAR** COMPANY

The rugged ProBilt interior features five grab handles, a powerful HVAC system and a charcoal colored dash made of durable materials that is easy to clean and shows less scratches and scuffs.

An advanced composite hood provides exceptional durability with a stainless steel grille to protect the cooling system. The hood design improves forward visibility.

Pod-mounted headlamps are durable, corrosion-resistant and cost-efficient to replace. They feature halogen bulbs for 50% greater low beam performance and nearly 600% longer bulb life.

A lightweight, huckbolted, all-aluminum cab with lap seam construction and bulkhead style doors is legendary for toughness and corrosion resistance. It provides years of virtually water-tight performance.

A multiplex electrical system offers diagnostic simplicity and reliability. The Electronic Service Analyst monitors the system, isolates sensors and gauges, and maintains an event log.

The rugged and versatile Model 365 can be spec'd with a wide variety of heavy duty components and in a number of configurations for increased payloads and optimized weight distribution.

Set-back front axle configurations are available with FEPTO and all set-forward front axle configurations are available with REPTO for versatility with job-specific applications.

The PACCAR MX engine is available with a wide range of horsepower and torque options and delivers maximum performance, superior fuel efficiency, longer service intervals, lower operating costs and higher resale value.

For vocational trucks, the Peterbilt Model 365 sets the standard for quality, durability and productivity. For more information on the Model 365, contact your local Peterbilt dealer or visit [www.peterbilt.com](http://www.peterbilt.com).
