

MODEL
384

 US EPA Certified
SmartWay[®]

Peterbilt

A **PACCAR** COMPANY

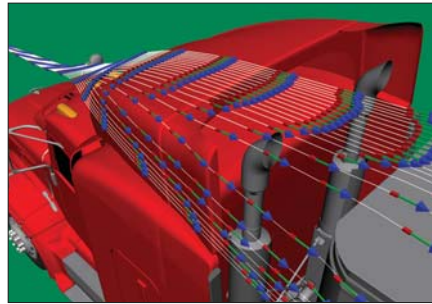

The SmartWay® certified Model 384 matches powerful performance with exceptional maneuverability and versatility. It's ideal for tanker, pickup and delivery, regional and short haul applications. The Model 384 features a 116" BBC, and offers a full range of heavy duty suspension, brake and drivetrain options. The Model 384 is lightweight and powerful for easy handling of the heaviest payloads. In the city or on the highway, Peterbilt quality and resale value have never looked better.

A **PACCAR** COMPANY

The Model 384 is recognized as fuel efficient and environmentally friendly by the EPA's SmartWay program, which establishes a set of fuel-saving, low-emission specs for Class 8 long-haul tractors.

Peterbilt's Aero Package combines a roof fairing and trim tabs, a sleeper roof transition, chassis fairings, an aero battery/tool box, a composite sunvisor, a 3-inch sleeper extender and aero mirrors to provide an estimated 12% improvement in aerodynamic efficiency gains over a non-equipped Model 384.

The ergonomic Prestige cab interior features a charcoal dash that reduces glare improving driver visibility, is scratch resistant and provides LED backlit gauges, while a powerful HVAC system improves overall performance.

The comfortable 63" Platinum sleeper features closets and cabinet doors with woodgrain accents while the Prestige sleeper has vinyl curtains and net enclosures. Both configurations feature shelving for amenities, Xenon lighting and a convenient control panel near the bunk.

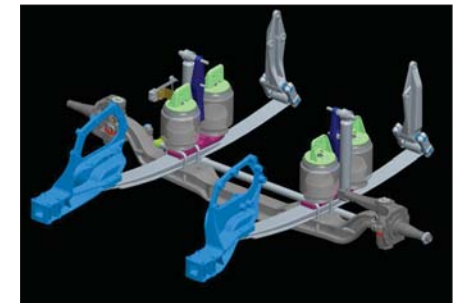

A lightweight all-aluminum cab with huckbolt fasteners, lap seam construction and bulkhead style doors is the leader in toughness, corrosion resistance and water-tight performance.

The PACCAR MX engine is available with a wide range of horsepower and torque options and delivers maximum performance, superior fuel efficiency, longer service intervals, lower operating costs and higher resale value.

The Model 384 is available in a day cab configuration and with a selection of Unibilt® sleepers to provide multiple configurations that fit virtually any business need or application.

Peterbilt's proprietary Front Air Leaf Suspension is lightweight and features a 20% improvement in ride quality over taper leaf suspensions for an extremely soft ride.

The versatile Model 384 combines maneuverability with high performance and durability. For more information on the Model 384, contact your local Peterbilt dealer or visit www.peterbilt.com.
