

MODEL 579

New Cab Features

Peterbilt

MODEL
579

For more information on the new Model 579, contact your local Peterbilt dealer or visit **peterbilt.com**.

New Cab Features

1. **STEERING WHEEL AND CONTROLS**
   A redesigned steering wheel with controls at the driver's fingertips improves ergonomics.

2. **DIGITAL DISPLAY**
   The new 15″ digital display is the largest in the industry, with easy-to-use features, customizable gauges and intelligent gauge monitoring.

3. **LANE KEEPING ASSIST**
   Adding to existing advanced driver assistance systems, new lane keeping assist technology utilizes inputs from the collision mitigation system to help keep the driver between the lines through an electric motor mounted on the steering column inside the cab, protected from the elements.

4. **INTERIOR COLORS**
   New interior colors, including a dark upper dash and new wood grains, provide a sleeker overall look and reduce glare.

5. **13" DISPLAY**
   Featuring a premium 13-inch portrait display, responsive knob-on-glass control, and an innovative suite of specialized applications through PACCAR Connect.

6. **TELEMATICS CONNECTIONS**
   Two standard RP1226 connectors behind the dash allow for aftermarket telematics connectivity with multiple connection locations and harness pass-through options to support virtually any configuration.

7. **SWITCHES**
   Easy-to-reach switches are wider for improved icon visibility and easier switch actuation.

8. **POWER PORTS**
   Added connectivity features include two, 12 volt power ports as well as optional USB ports.

9. **CUP HOLDERS**
   The redesigned cup holder is more robust with no moving parts, and deeper to prevent tipping and accomodate larger-sized cups.

10. **STORAGE**
    Additional cab storage is now available in a variety of configurations, including the standard C-panel cubby, cup holder and optional storage compartment on the B panel, all located within easy reach.
